MARCO GOEDERT

Software Engineer
Porto Alegre, Rio Grande do Sul, Brazil.

hello@marcogoedert.com

About me

Software Engineer with experience designing, building, and evolving production systems across frontend, backend, and infrastructure layers. I have worked on applications from early concept and validation stages to large-scale internal platforms, with a strong focus on scalability, maintainability, performance, and developer experience.

I thrive in fast-paced, product-driven environments, collaborating closely with design, product, and engineering teams to turn ambiguous requirements into reliable solutions. My background combines solid engineering fundamentals with hands-on experience in modern web technologies, distributed systems, and experimentation-driven development.

TypeScript · React · Node.js · Software Architecture · Testing · AI-powered apps · Python · Docker · Kubernetes · CI/CD · SQL · NoSQL · Design System · Agile

Latest Experiences

TELUS Digital - Platform Software Engineer

Jul 2025 - Present / Porto Alegre, Rio Grande do Sul, Brazil

Front-end Software Engineer at TELUS Digital (Fuel iX), contributing to the **AQM (Agent Quality Management)** platform using **React, Next.js, and TypeScript**, delivering production-ready features in a fast-moving, hypothesis-driven environment. Beyond feature implementation, I actively participate in **technical decision-making, architectural discussions, and UX collaboration**, partnering closely with design to translate early-stage mockups into validated user experiences.

Dell Technologies - Software Engineer 2

Mar 2024 - Jul 2025 / Eldorado do Sul, Rio Grande do Sul, Brazil

As a Software Engineer 2 at Dell Technologies, I worked on initiatives involving **AI-powered chatbots** and distributed architectures, including **micro-frontends and microservices**, supporting the evolution of internal enterprise platforms used at scale. My work focused on improving **performance, availability, and security**, ensuring systems could grow reliably while meeting strict internal standards.

In addition to feature development, I contributed to **architectural decisions, system integration, and technical improvements** across frontend and backend boundaries. I collaborated with cross-functional teams to evolve existing solutions, address scalability challenges, and introduce more resilient patterns, strengthening the overall engineering quality and long-term sustainability of the platforms.

Dell Technologies - Software Engineer 1

Oct 2021 - Feb 2024 / Eldorado do Sul, Rio Grande do Sul, Brazil

I joined Dell Technologies as a Software Engineer Intern and quickly transitioned into a full-time Software Engineer role, contributing across frontend, backend, and infrastructure layers. During this period, I worked extensively with **design systems and Atomic Design**, developing dashboards and productivity applications with a strong focus on consistency, usability, and maintainability.

In parallel, I contributed to internal tools with **API and CLI development using Domain-Driven Design**, helping deliver robust, scalable solutions aligned with enterprise engineering standards.

Dell Technologies - Software Engineer Intern

May 2020 - Oct 2021 / Eldorado do Sul, Rio Grande do Sul, Brazil

I designed and implemented a **monitoring platform** from the ground up, enabling real-time alerts and visibility into applications, services, and log data. The platform evolved into a core internal solution, later expanded by a dedicated team to support broader observability use cases.

Portosys - Software Engineer Intern

Oct 2019 - May 2020 / Porto Alegre, Rio Grande do Sul, Brazil

Worked on both support and development of IFS ERP applications with C# and PL/SQL.

Education and Certifications

Bachelor's degree, Software Engineering

Aug 2018 - Jul 2023 / PUC-RS (Pontifícia Universidade Católica do Rio Grande do Sul)

Career and Technical Education, Information Technology

Feb 2014 - Sep 2015 / Escola Técnica Mesquita
